

Sreelal H

MOBILE ENGINEERING LEAD | TECHNICAL ARCHITECT | ENGINEERING MANAGER

PROFESSIONAL SYNOPSIS

With over 16 years of experience in the IT industry, I am a seasoned Technical Lead/Architect specializing in Mobile Applications. Throughout my career, I have successfully collaborated with global teams across diverse locations, demonstrating a profound understanding of global team cultures. My expertise primarily revolves around native application development in iOS and Cross-platform application development using the latest technology stacks like React Native.

In addition to my technical skills, I have extensive experience in leading Agile sprints as both a technical expert and Scrum Master. This includes overseeing sprint planning, daily stand-ups, backlog grooming sessions, and sprint reviews. I am well-versed in modern software architecture and design patterns, including MVVM, MVP, and Clean Swift. Moreover, I maintain a solid understanding of emerging technologies such as AI, ML, and Data Science & Analytics. Furthermore, I have hands-on experience with modern build strategies, encompassing unit testing, TDD, static analysis, and Devops. Additionally, I have a proven track record in developing applications for banks, further amplifying my breadth of experience and expertise in the field.

EXPERIENCE

ERNST AND YOUNG LLP(EY)

SENIOR MOBILE APP ENGINEER / ARCHITECT FROM AUG 2015

TATA CONSULTANCY SERVICES (TCS)

ASSISTANT CONSULTANT FROM SEP 2012 - AUG 2015

UST GLOBAL (UST)

SENIOR SOFTWARE ENGINEER FROM MAR 2011 – SEP 2012

RAPIDVALUE SOLUTIONS

SENIOR SOFTWARE ENGINEER FROM JUN 2009 - OCT 2010

KTS INFOTECH

SOFTWARE ENGINEER FROM JAN 2008 - MAY 2009

EDUCATION

B. Tech in Information Technology

SKILLS

- Swift/SiftUI, Objective C
- React Native, React JS
- Java Script, Python
- C#, Node.JS, MongoDB
- Hybrid/Cross platform App Development
- XCTest and XCUITest
- Microsoft Azure
- Data Science

CERTIFICATIONS

- Github Copilot (2025)
- Microsoft: Azure AI Fundamentals (2025)
- Microsoft: Azure Data Scientist Associate (2024)
- IIMK: Certified in Data Science (2022)
- ScaledAgile: SAFe® Agilist (2022)
- ScrumAlliance: Certified Scrum Master (CSM®) and Certified Product Owner (CSPO®) (2021)
- Microsoft: Azure Cloud Developer Associate (2020)

RECENT AND RELEVANT PROJECTS

BANK OF BANGKOK – TECHNICAL ARCHITECT/MANAGER

React Native Application (iOS & Android)

- Served as the Technical Architect/Lead Developer for a React Native Wallet app project, overseeing the successful implementation and delivery of key functionalities.
- Implemented core business components using SDKs such as Microsoft Entra for Wallet functionality and NEC for Face Detection.
- Contributed to the creation of the architecture and development of core modules.
- Collaborated closely with business development teams to gather new requirements, translating client needs into actionable project plans.
- Prepared comprehensive technical design documentation, providing clear guidelines and specifications for the development team to follow.
- Played an integral role in the unit testing phase of the application, utilizing the Jest framework to ensure robust functionality and identify any defects.
- Supported the DevOps team in setting up CI/CD to distribute iOS and Android Applications.

BANK OF SINGAPORE – TECHNICAL ARCHITECT/MANAGER

iOS Native Application, Swift with SnapKit

- Served as the Technical Architect/Lead Developer for a native app project, overseeing the successful implementation and delivery of key functionalities.
- Managed an offshore team from the onshore location in Singapore, fostering effective collaboration and ensuring smooth project execution.
- Worked closely with business development teams to gather new requirements, translating client needs into actionable project plans.
- Demonstrated a deep understanding of the existing source code architecture, leveraging this knowledge to develop and integrate new features seamlessly.
- Prepared comprehensive technical design documentation, providing clear guidelines and specifications for the development team to follow.
- Played an integral role in the unit testing phase of the application, utilizing the XCTest framework to ensure robust functionality and identify any defects.
- Proactively troubleshooted and resolved assigned bugs by effectively utilizing JIRA, ensuring timely resolution and optimal application performance.
- Provided regular project status reports to stakeholders, keeping them informed about the project's progress, challenges, and achieved milestones.

KAISER PERMANENTE – TECHNICAL SCRUM MASTER / LEAD

iOS Native Application, Swift

- Developed a secure native app for Kaiser Permanente, providing members with a user-friendly platform to manage their health.
- Served as a Technical Scrum Master/Lead, effectively managing offshore team members to ensure smooth project execution and timely deliverables.

- Collaborated with onsite business development teams to gather new requirements, ensuring alignment with project goals and objectives.
- Demonstrated a comprehensive understanding of the existing source code architecture, enabling the seamless integration of new features.
- Prepared detailed technical design documentation, providing clear guidelines and specifications for the development team.
- Led Agile sprints as the Scrum Master, overseeing sprint planning, daily stand-ups, backlog grooming sessions, and sprint reviews.

ROYAL CARIBBEAN CRUISES – SENIOR DEVELOPER / TECHNICAL LEAD

iOS Native Application, Swift

- Developed an iOS native app for Royal Caribbean Cruises, aimed at enhancing the frictionless boarding and connected stateroom experience for guests.
- Successfully integrated various functionalities, including the Digital Keys SDK, automation of stateroom processes, indoor positioning, and integration of Mapbox and Mapwize SDKs.
- Collaborated closely with business development and onsite teams to gather new requirements, ensuring alignment with the cruise line's objectives and guest expectations.
- Demonstrated a thorough understanding of the existing source code architecture, enabling seamless integration of new features and enhancements.
- Leveraged design patterns like Clean Swift, Delegation, and Singleton to maintain a scalable and maintainable codebase.
- Actively participated in unit testing using the XCTest framework, ensuring high-quality and bug-free code.
- Proactively troubleshooted and resolved assigned bugs by effectively utilizing JIRA, ensuring optimal app performance and a smooth user experience.
- Integrated third-party frameworks for Digital Keys and Indoor Mapping, expanding the app's capabilities and enhancing user convenience.
- Provided valuable inputs and suggestions to peer developers after code reviews, fostering continuous improvement and adherence to best practices.
- Regularly provided project status reports to stakeholders, keeping them informed about the project's progress, challenges, and milestones achieved.

INSURANCE CLAIM ADJUSTER/SURVEYOR – SENIOR DEVELOPER

iOS / Android Hybrid Application, Cordova, Angular JS

- Developed the Adjuster/Surveyor mobile app, an intuitive and user-friendly solution for property and casualty claims adjusters to perform claim settlement activities conveniently on the go.
- Collaborated closely with business development and onsite teams to gather new requirements, ensuring the app meets the specific needs of claims adjusters and aligns with business objectives.
- Designed the application architecture and developed the core framework, providing a solid foundation for seamless functionality and performance.
- Leveraged design patterns like MVVM, Delegation, and Singleton to create a scalable and maintainable codebase.

- Played a proactive role in code reviews, providing valuable inputs and suggestions to peer developers to ensure code quality and adherence to best practices.
- Actively troubleshooted and resolved bugs assigned over JIRA, ensuring the app's stability and a smooth user experience.

CITI EMPOWER FINANCIAL COACHING – SENIOR DEVELOPER / TECHNICAL LEAD

iOS Native Application, Swift

- Developed the Empower iOS App, a powerful financial coaching app that provides users with insights into their spending habits and helps them save and spend smarter by leveraging various financial APIs.
- Implemented functionality to allow users to link different spending accounts and gain a comprehensive understanding of their financial transactions.
- Integrated OCR scanning of driving licenses for secure authentication using the Au10Tix framework, ensuring a seamless and secure user experience.
- Led a team of four resources, effectively managing their tasks, providing guidance, and ensuring timely delivery of project milestones.
- Actively participated in Agile scrums, collaborating with cross-functional teams to ensure efficient development processes and timely issue resolution.
- Designed the application architecture and developed the core framework, establishing a solid foundation for scalable and maintainable code.
- Interacted directly with clients, gathering feedback, discussing requirements, and ensuring client satisfaction throughout the development lifecycle.
- Regularly provided project status reporting to stakeholders, keeping them informed about the progress, challenges, and milestones achieved.

OTHER MAJOR CLIENT PROJECTS

- Safety Insurance (US)
- GE Catalog & Water RMD for GE (US)
- KPMG iPublications (US)
- Claim Adjuster for AMFAM Insurance (US)
- Surveyor App for AXA Asia (Bangkok)
